

Trust Management Software Proposal

Software Development Proposal

Prepared By: Tamilarasan N, Senior Software Engineer

Project Overview

This project is a web-based Trust Management System designed to help the trust manage donor information and event activities efficiently. The system will include a public portfolio website and a secure admin panel accessible only by authorized administrators.

Technology Stack

- **Frontend:** React.js
 - **Backend:** Node.js + Express.js
 - **Database:** PostgreSQL
-

Project Modules

1. Trust Portfolio Website

The portfolio website will showcase the trust's activities and information.

Features

- Modern and elegant Home Page
 - About Trust
 - Mission & Vision
 - Gallery with image display
 - Events Section
 - Contact Page
 - Donation Information
 - Responsive Design (Mobile & Desktop)
 - Smooth navigation and clean layout
 - SEO-friendly structure for better visibility
-

2. Secure Admin Panel

A secure admin panel will be developed for trust administrators.

Authentication

- Admin Login
 - Email & Password Authentication
 - Only authorized admin email can access the dashboard
 - Secure session handling
 - Protected admin routes
-

3. Donor Management

The admin can view donor information collected through the website.

Features

- View donor list
 - Donor Name
 - Email Address
 - Phone Number
 - Donation Amount
 - Donation Date
 - Search donor details
 - Filter and sort donor records
 - Easy donor tracking
-

4. Event Management

The admin can manage all trust events.

Features

- Add New Event
 - Edit Event
 - Delete Event
 - View Completed Events
 - View Upcoming Events
 - Event Date & Description
 - Event banner or image upload
 - Event status tracking
-

5. Event Reminder

The system will automatically notify the admin 2 days before an upcoming event.

Reminder Features

- Automatic reminder notification
 - Dashboard reminder message
 - Upcoming event alert
 - Timely event notification support
-

6. Dashboard

The dashboard will provide a quick overview of trust activities.

Dashboard Includes

- Total Donors
 - Upcoming Events
 - Completed Events
 - Recent Donations
 - Recent Activities
 - Quick summary cards
 - Clean visual dashboard layout
-

7. Additional Enhancements for a More Elegant and Super Project

To make the project more professional, elegant, and user-friendly, we will also add the following improvements:

Added Enhancements

- Modern UI/UX design with a premium look
 - Smooth animations and transitions
 - Clean and organized dashboard interface
 - Better color theme and typography
 - Search and filter options for easy data access
 - Notification system for important updates
 - Activity log for admin actions
 - Data validation and proper error handling
 - Secure and scalable database structure
 - Future-ready architecture for adding more modules later
-

Security

- Secure Login Authentication
 - Password Encryption
 - Protected Admin Routes
 - Database Security Best Practices
-

Deliverables

- Complete React.js Website
 - Secure Admin Panel
 - Backend API
 - PostgreSQL Database
 - Deployment Support
 - Source Code
-

Development Timeline

Estimated Duration: 10-20 days

Project Quotation

Item	Amount
Trust Portfolio Website	₹10,000
Admin Panel Development	₹12,000
Backend APIs	₹5,000
PostgreSQL Database Integration	₹3,000
Deployment & Testing	Included

Total Project Cost

₹30,000

Special Discount for Antony

For Antony, we can offer a discount of ₹5,000, bringing the final project cost to:

₹25,000

Warranty & Support

- 30 Days Free Bug Fix Support
 - Minor bug fixes included
 - Future feature enhancements will be quoted separately
-

Thank you for the opportunity to work on this project.
